THE HORSEWHIP INCIDENT

A fifth grader performed a recently learned dance technique in dance class on August 21. After a brief rest, she noticed that her hands matched the color of the horsewhip. That's when she saw the tool had colored her hand. The "bad quality" that Taobao horse whips provide has many complaints these days because they stain your hands. Although the toxicity of these colors is still unknown, we advise against sweating significantly when using a pink horsewhip! Some of us wonder if the quality of some products sold in Hong Kong are safe for people to use.

Can you wash it? Since the color is used to permanently dye the Horsewhip, we do not believe it to be washable. The short pink Horsewhip is not something we recommend using as it may be harmful and will make you appear paler. This serves as a caution. Please think about considering our recommendations. Otherwise, people risk having pink hands that could be harmful or dangerous to people everywhere.

SHOULD WE HAVE LONGER RECESS TIME? OR SHOULD WE HAVE SHORTER RECESS TIME?

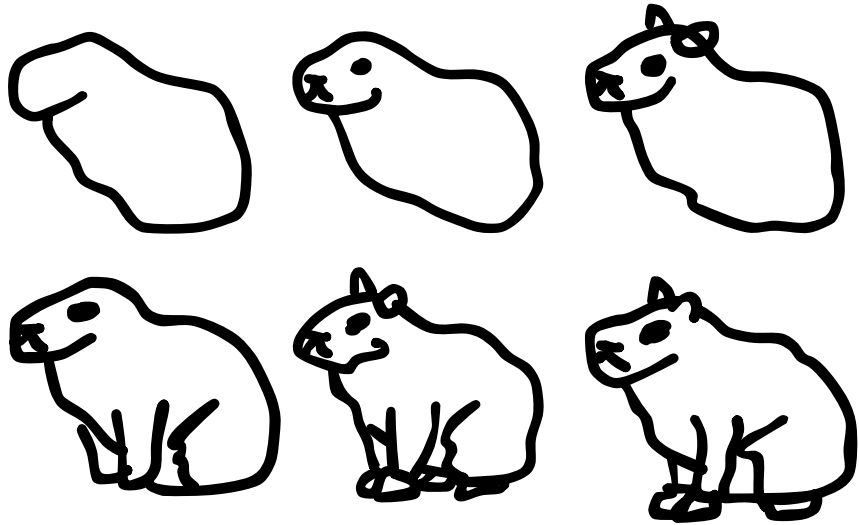

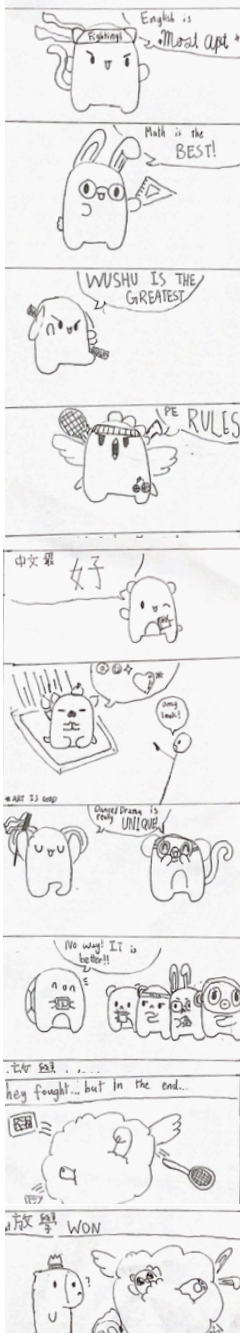

We presume that practically all of the students at the school desire more time for recess. This is because 30 minutes of recess is insufficient for young children to spend socializing with their friends. We should play for at least 45 to 50 minutes. It's not just that we get to spend more time with our friends, but also frees up more time for studying and reading! Consider how many people visit the library every day; when the bell rings, everyone moans. Do you not understand? Library users desire more time to read since, after all, reading is a requirement for studying, which is what all teachers want, right? For their students to study rather than spend their entire day playing video games, correct? The team as Liquacious News has based this report after talking taking feedback from many student in this school.
